App. Ser. No.: 09/661,739 Atty. Doc. No.: D02340

## **CLAIMS**

JAN-11-2006 15:15

Please amend the claims as follows.

- 1. (Cancelled)
- 2. (Currently Amended) The system as defined in claim + 14 wherein the at least one communication device comprises a telephone with a keypad for selecting prompt/announcement the user-specified subset of files.
- 3. (Currently Amended) The system as defined in claim 2 wherein the selected prompt/announcement user-specified subset of files comprise voice files.
- 4. (Currently Amended) The system as defined in claim 1 14 wherein the at least one communication device comprises a computer with a keyboard for selecting subscriber specified prompt/announcement the user-specified subset of files.
- 5. (Currently Amended) The system as defined in claim 1 14 wherein the selected <u>user-specified subset of files</u> are chosen from a group consisting of text files, video files and multimedia files.
- 6. (Currently Amended) The system as defined in claim 1 14 wherein the at least one communication device comprises:

App. Ser. No.: 09/661,739 Atty. Doc. No.: D02340

a telephone with a keypad for selecting a first group of <u>user-specified subset of</u> files; and

a computer with a keyboard for selecting a second group of <u>user-specified subset</u> of files.

- 7. (Currently Amended) The system as defined in claim 6 wherein the first group of <u>user-specified subset of</u> files comprises voice files and the second group of <u>user-specified</u> <u>subset of</u> files comprises files chosen from a group consisting of text files, video files and multimedia files.
- 8. (Currently Amended) The system as defined in claim 1 14 wherein the network comprises an HFC network and the telecommunications device comprises a communication gateway.

9-13. (Cancelled)

14. (Currently Amended) A system for providing locally generated prompts/announcements in a telecommunications network, the system comprising:

a centralized server for storing a plurality of prompt/announcement files, said plurality including various types of files and organized in a system with respect to user characteristics of a system user;

App. Ser. No.: 09/661,739 Atty. Doc. No.: D02340

a telecommunications device located in close proximity to the system user, said telecommunications device for downloading a user-specified subset of files associated

with said user characteristics from said plurality of files; and

at least one communication device for interacting with said telecommunications device and selecting the user-specified subset of files from said plurality of files to be downloaded.

wherein said user characteristics include the system user's location.

15. (Cancelled)

16. (Previously presented) A method of providing client-side prompt/announcement

files for use by a subscriber on a local telecommunications device from a plurality of

prompt/announcement files stored on a centralized server, the method comprising the

steps of:

a) determining subscriber-specific characteristics from subscriber-provider input;

b) determining the type of user entry device; and

c) downloading a subset of prompt/announcement files from the centralized

server to the local telecommunications device based upon the subscriber-provided,

subscriber-specific characteristics and the determined type of user entry device,

wherein in performing step a), the subscriber-specific characteristics include

location.

17. (Cancelled)
